Overview of one4all application

one4all application intends to facilitate productivity in ordinary route at SONY SH.
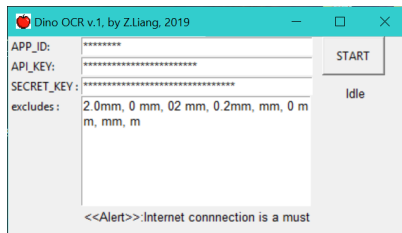

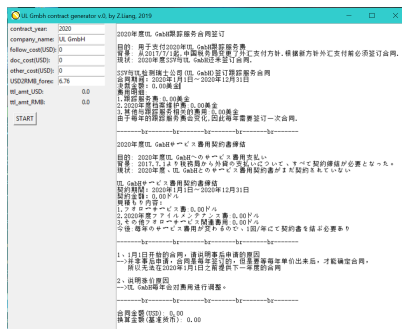

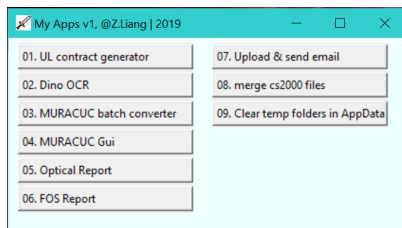

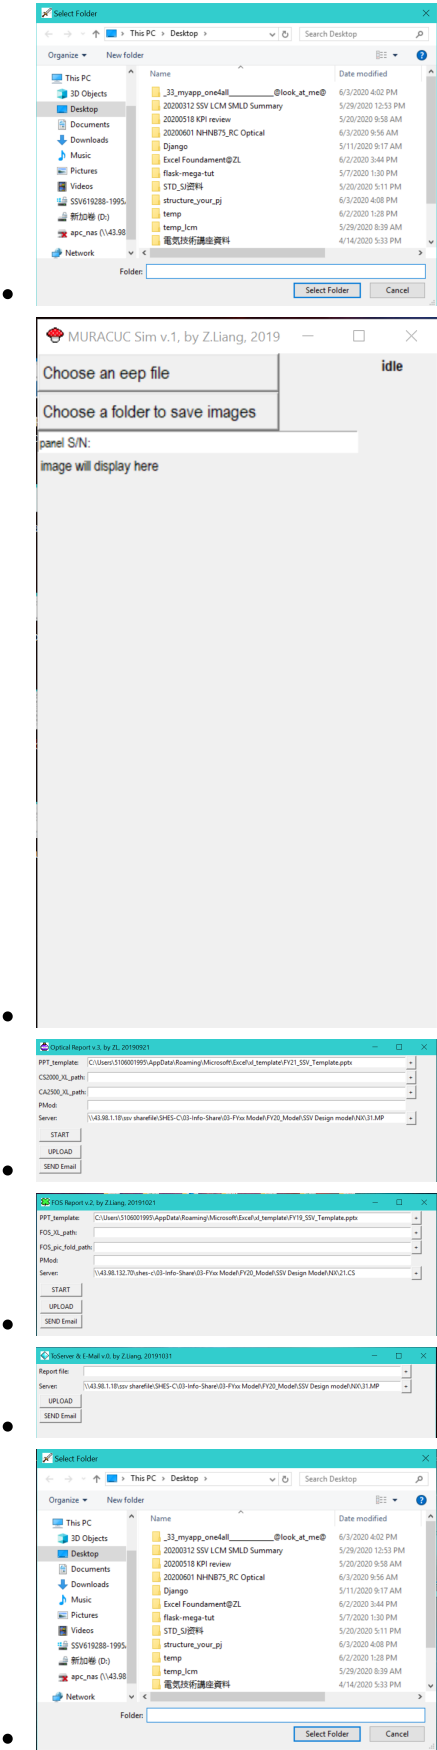

Application Functionality

It includes the following functions.

- converts *MURA/CUC* logs to images by `batch`
- generates *UL GmbH* contract `GUI`
- converts *MURA/CUC* log to image one by one with `GUI`
- recognizes *Dino* measurement results and converts them and saves into `.csv`
- creates optical reports(`.ppt`) based on *CS2000* and *CA2500* logs during Panel Optical R&D
- creates *FOS* reports(`.ppt`)
- uploads data and report to a specified server and sends notification via email
- merges cs2000 logs
- kills `temp folders` in `AppData`

Usage

Basically, they are user-friendly, right out of box to use.
